Australia's Uluru begins permanent climbing ban

Uluru, the symbol of Australia's Outback and once known as Ayers Rock, was officially closed to climbers permanently on October 26.

The closure comes after a decades-long effort by indigenous people, who consider Uluru a sacred place, to stop people climbing up the 348-meter-tall rock.

Climbing Uluru is also dangerous.

Dozens of people have died while trying to climb it, including a 76-year-old Japanese man in 2018.

問1 オーストラリアが決定したことは何ですか。

問2 そのように決定したのはなぜですか。
